CPME Program Overview

Certified Project Management Expert or (CPME) is designed to produce skilled professionals, who have the right knowledge and expertise to meet goals, and manage the rising project work with a shortage of time. It develops skills required to initiate, plan, control, and close a project using both, traditional and agile methodologies. CPME is designed to,

- Develop necessary skills, which are required to successfully manage and lead projects.
- Train professionals so they may deliver projects within time, cost, and quality constraints.
- Prepare for the examination of PMP, Agile Project Management, and MS Project®.

Program Structure

CPME comprises of total five project management courses and each course encompasses a specific body of knowledge and practice that prepare students for rewarding positions. It starts from the fundamentals of Project management.

CPME Coursework

Project Management Fundamentals
Project Management Tools & Techniques - I
Project Management Tools & Techniques - II
Agile Project Management
Managing a Project Using Software

Accreditation

- CPME is awarded by AIMS - a CPD accredited and UKRLP registered institute. CPD accreditation assures that AIMS' practical and methodical approach is focused to improve professional development.
- CPME Total Qualification Time (TQT) is 225 hours and it is designed as per Ofqual Level-4 standards of Regulated Qualifications Framework (RQF).
- CPME is also recognized by several international bodies as a fifteen (15) credit hours of graduate studies.

Why Project Management?

Project Management is the planning and organization of resources to perform a task, an event, or a duty towards completion. Demand for project management skills has increased in the last decade, and it has become a fundamental need of today's business. Project management skills are need of professionals, who are working in all industries. These industried includes finance, engineering, information technology, management, and healthcare.

Our Students Say!

"My Certified Project Management Expert studies were life-changing. I found it very comprehensive and well-structured. This online project management training is led by outstanding lecturers. E-Learning contents are developed with great effort and that made learning interesting. I improved my skills as well as obtained PDUs and exam prep for PMP & Agile certification. I always urge my colleagues to make the right choice of enrolling with AIMS."
